

MULTI-LAYERS CELL FACTORY

- ▶ Multi-layers cell factory is the adherent cells' ideal choice for industrial mass production, laboratory operations, and large-scale cell cultures. Compared with other brands, Fudau cell factory has good performance in culture.
- ▶ Polystyrene (PS) material meet USP VI medical grade. Combined with heat treatment process of injection molding, the toughness product is not easy to be damaged while transferring.
- ▶ Meanwhile, the product has undergone a three-level sealing test before delivery to ensure airtightness.
- ▶ The production processes in Class-C workshop to comply with ISO13485 by using professional automatic production line.
- ▶ With the perfect quality management system, each batch of products has been tested to ensure the consistency and stability of product performance between different batches.

MULTI-LAYERS CELL FACTORY

- ▶ Double wid-mouth design improves the speed of filling and harvesting liquid, with hardly bubbles, also conducive for gas exchange and high-density cell culture.
- ▶ Equipped with quick-fit seal cap (patented product), it can switch between airtight and breathable state in conventional environment (greenhouse) to meet the needs of dissolved oxygen and exhaust in different culture stages of cells and viruses.
- ▶ The cell-factory is equipped with a complete set of sealed pipeline system, which can be connected with the liquid inlet and receiving system pipeline, and the liquid input and output are carried out by peristaltic pumps or pressure systems.

TC Treated Vent Cap

Item No.	Layer	Culture area (cm2)	Length (mm)	Width (mm)	Height (mm)	pcs/pack	pcs/case
